December 2025 - Joseph Sansone video statement in support of Leeuwarden litigation

https://www.youtube.com/watch?v=aRA9UtWLJt4

Pursuant to 28 USC 1746, I, Joseph Sansone, declare under penalty of perjury that the following statement is true to the best of my knowledge. I'm a psychotherapist with a bachelor's degree in psychology, a master's degree in clinical mental health counseling, and a PhD in psychology.

I've been litigating here in Florida for over a year and a half to get the mRNA nanoparticle injections off the market because they're biological and technological weapons of mass destruction, in violation of Florida statute 790.166, 18 USC 175 Chapter 10, Biological Weapons as well as the [UN] Biological Weapons Convention, of course.

I filed an affidavit in my case from Dr. Francis Boyle, the law professor that wrote the Biological Weapons and Anti-terrorism Act of 1989.

Dr. Francis Boyle was arguably the world's leading legal authority on biological weapons. Dr. Boyle clearly states in his affidavit that COVID injections and MRA nanoparticle injections are in violation of Florida statute 790.166, Weapons of Mass Destruction as well as 18 USC 175 Chapter 10, Biological Weapons.

Keep in mind that the Biological Weapons and Anti-Terrorism Act of 1989 was the US domestic implementation of the [UN] Biological Weapons Convention.

I certify the authenticity of Dr. Francis Boyle's affidavit as well as his intention to testify in this case that the COVID injections and mRNA injections are biological weapons and weapons of mass destruction clearly in violation of the Biological Weapons Convention and relevant Dutch laws.

I've also been initiating legislation to prohibit the mRNA nanoparticle injections because they are already illegal in violation of existing biological weapons and weapons of mass destruction laws.

I believe that the COVID-19 injections and the mRNA nanoparticle injections are biological and technological weapons of mass destruction in violation of the Biological Weapons Convention and relevant Dutch laws.

There can be no lawful purpose to distribute biological and technological weapons of mass destruction targeting civilian populations.

There can be no lawful purpose to inject civilians with these weapons of mass destructions.

There can be no law that sanctions murder and genocide. Such a law would be invalid on its face.

In short, the mRNA nanoparticle injections have a negative effectiveness. mRNA nanoparticle injections cause harm including death. mRNA nanoparticle injections injure and kill directly through injection and indirectly through transmission or shedding of the material in the injections. mRNA nanoparticle injections contain dual-use technology.

Governments, the pharmaceutical industry, as well as government- and corporate-controlled media deliberately concealed the negative harms from these injections.

The mRNA nanoparticle injections have no prophylactic effect. They cause a myriad of diseases and disorders.

Governments, healthcare facilities, and the media deliberately concealed this information from the public, showing clear criminal intent.

The Florida Department of Health in official bulletins has stated that the mRNAinjections are not safe for humans and a potential threat to the human genome.

The United States Department of Health and Human Services has admitted that the mRNA injections provide no protection for flu or COVID, meaning there's no prophylactic effect, and the risks outweigh the benefits.

Once again, by keeping these injections on the market, that shows clear criminal intent.

According to the *Kansas v. Pfizer* case, this information was available to health authorities as early as December of 2020.

The mRNA nanoparticle injections were a DARPA [US Defense Advanced Research Projects Agency] project.

Furthermore, what is called COVID-19 is an offensive weapon of biowarfare.

The fact that the quote-unquote "virus" was also in the quote-unquote "vaccine" also means that the vaccine was in fact a bioweapon. This shows premeditation and foreknowledge for those that perpetrated this crime.

A recent peer-reviewed journal article by Dr. Andrew Zywiec et al published in the *American Journal of Physicians and Surgeons* ['COVID-19 Injections: Harms and Damages, a Non-Exhaustive Conclusion,' Fall 2025] clearly states that both the quote-unquote "virus" and the quote-unquote "vaccine" violated the Biological Weapons Convention.

More recently, the Alliance of Indigenous Nations International Tribunal issued an order declaring mRNA nanoparticle injections and Covid injections to be biological and technological weapons of mass destruction, becoming the world's first governing body and judicial authority to make such a declaration.

Recent research out of Japan showed that among 21 million people, there was an excess 610,000 deaths attributed to the Covid injections. When adjusted for population that would mean that the VAERS [Vaccine Adverse Event Reporting System] system in the United States has an under-reporting factor of 41. Therefore 1,558,000 people died shortly after getting these injections.

Keep in mind these are people that died shortly after these injections. These are not people that are getting cancer, heart diseases, autoimmune problems, and so on, currently.

There are some estimates that show as many as there are 5,000 excess deaths a week or 250,000 excess deaths a year currently in the United States. As many as, recent research also showed, that as many as 75% of those that got these injections, even if they're asymptomatic, have autoimmune problems. Sometimes this is called Vaccine Acquired Immune Deficiency Syndrome or VAIDS.

The Covid-19 nanoparticle injections are associated with neurological disorders and diseases, autoimmune diseases, heart problems, cancers, inflammatory disorders and so on. The Covid-19 nanoparticle injections are associated with a 1236% increase in cardiac arrest death. A 112,000% increase in brain strokes when compared to the traditional flu shot. They're associated with increased infant mortality, reduced birth rates, and reduced lifespans by as much as 37%. Extrapolated over a lifetime, this could be as much as a 29-year reduction in life. This would mean that a child getting an injection today will be lucky to live into their 50s.

The Defense Medical Epidemiology Database, DMED, information was released from this database during Senator Ron Johnson's hearings in February of 2022. This database showed, among the United States military personnel, a dramatic increase in autoimmune disorders, neurological disorders and diseases, heart problems, cancers, heart attack, strokes and so on.

The mRNA nanoparticle injections show uncontrolled biodistribution of spike proteins and other materials throughout the body also leading to shedding of this technology to unvaccinated individuals.

Darkfield microscopy reveals that hydrogels and nanotechnologies or nano-particles are present not only in the blood of the vaccinated but also in the blood of the unvaccinated through shedding or transmission.

US patents showed that the nanoparticle technology is a dual-use technology and can be used to target cells and maliciously used to target and infiltrate cells genetically.

In conclusion, mRNA nanoparticle injections cause harm, injure and kill directly, injure and kill indirectly through shedding. They have a negative effectiveness, no prophylactic effect whatsoever. They can contain dual-use nanotechnology. They have uncontrolled spike protein distribution. And there appears a clear, concerted effort between governments, the healthcare industry, the pharmaceutical industry, and the media to conceal the negative and harmful consequences of these deadly weapons of mass destruction.

The sad reality is that most people will have a shortened lifespan because of the complications of these mRNA nanoparticle injections. Reduced lifespans, increased infant mortality, reduced birth rates show a clear agenda for depopulation.

The altering of the genetic code is an existential threat to the future existence of our species.

This court has an opportunity to redress these crimes. I pray that this court will hear the evidence and do everything possible to protect the public from these weapons of mass destructions in an effort to protect and save our species.
